ABHIRAMI MURALEEDHARAN

Kitchener, ON | 343.989.7788 | abhiramims333@gmail.com | LinkedIn | GitHub | Blog | Portfolio

PROFESSIONAL PROFILE

Full-Stack Software Engineer building production TypeScript, React/Next.js and Python applications. Migrated a 1M+ user content page to Next.js (70% Lighthouse Performance gain) and cut end-to-end latency 70% on a production FastMCP AI service. Google Summer of Code 2025 contributor with 96% test coverage on an open-source Next.js/GraphQL project.

SKILLS

Languages: TypeScript, Python, JavaScript
Frontend: React, Next.js, Angular, Tailwind CSS, RxJS
Backend: Node.js, Express.js, GraphQL, REST APIs
Data: PostgreSQL, SQL, Database & Schema Design, Query Optimization
Cloud: Microsoft Azure, Azure Blob Storage, Azure DevOps
Testing: Vitest, React Testing Library, Python unittest, Jest, Playwright
AI / AI Integration: FastMCP, MCP, AI service integration, Claude Code, GitHub Copilot

WORK HISTORY

Software Developer - Reknowledge Inc, Kitchener ON, December 2025 - Present

- Migrated a high-traffic content page serving 1M+ users from React/Redux to Next.js, improving Lighthouse Performance by 70%, LCP by 57%, and TBT by 82% through SSR and code splitting.
- Optimized asynchronous workflows and streaming pipelines for a production Python FastMCP AI service, reducing end-to-end latency by 70%.
- Designed 2 database schemas and implemented 10 CRUD and bulk APIs for a rule-driven compliance and lifecycle platform.
- Re-architected authorization and database schemas to enforce operator certifications by serial number and location.
- Integrated Azure Blob Storage for application content, configuring storage permissions, Azure RBAC roles, environment variables, and development workflows.
- Used Docker and Datadog to troubleshoot application startup, production issues, logs, and API activity.
- Integrated JW Player, PubNub, and Google Analytics for real-time video, low-latency chat, and 7+ playback and engagement events across live and on-demand content.
- Developed and tested production features with Jest and Playwright for unit/integration and end-to-end testing.

Google Summer of Code 2025 Contributor - The Palisadoes Foundation, Remote, June - October 2025

- Migrated a legacy Flask UI to Next.js/React with GraphQL, cutting bundle size by 501 KB through route-based code splitting.
- Built interactive network topology visualizations with lazy-loaded vis-network components and historical analytics dashboards.
- Developed a configuration management UI with secure credential handling and SNMP v3 support, reducing device provisioning errors.
- Increased test coverage to 96% using Vitest and React Testing Library, reducing regression risk.
- Reduced LCP to 1.7s and FCP to 0.2s through lazy loading, React.memo, and SWR caching.

Open-Source Contributor - Web/UI - The Palisadoes Foundation, Remote, December 2024 - May 2025

- Redesigned and standardized CSS across four documentation sites, improving performance scores from 73 to 82 and accessibility from 93 to 96.
- Collaborated with 3 contributors on the "Talawa" project and added Python unit tests to SwitchMap-NG, improving maintainability and onboarding.

ADDITIONAL EXPERIENCE

Shipper, Wieland Electric (2023 - 2025) - Improved packing efficiency 53% via barcode scanning improvements.
Inventory Clerk, Amazon (2022 - 2023) - Automated freight classification; top 5% for quality and productivity.

EDUCATION

- Post-Graduate Diploma in Construction Project Management, Fanshawe College, 2021
- M.Eng. Civil Engineering, Queen's University, 2020
- B.Tech. Civil Engineering, NIT Calicut, 2019

CERTIFICATIONS

- **Google IT Automation with Python** - Python scripting, cloud configuration, Git/GitHub | Coursera, 2023
- **The Complete Web Development Bootcamp** - Full-stack development, MERN | Udemy, 2023
